Summary

Full Stack Developer and Frontend Engineer with 3+ years of experience and 30+ client projects delivered across web and mobile. I build things that don't just work they look exceptional. From scalable backend systems and cross-platform React Native mobile apps to pixel-perfect web interfaces and immersive 3D experiences with Three.js, GSAP, and Framer Motion, I bring designs to life with precision and depth. E-commerce experienced, cross-platform ready, and obsessed with clean architecture and every last detail of the user experience.

Technical Skills

- Frontend : Next.js, Redux Toolkit, TypeScript, Tailwind CSS, Chakra UI, Three.js, GSAP, Framer Motion
- Backend : Node.js, Express.js, RESTful APIs, GraphQL, WebSockets (Socket.IO)
- Databases : MongoDB, PostgreSQL, Firebase Firestore, Supabase
- DevOps & : Docker, CI/CD Pipelines, AWS EC2, AWS S3, Nginx, GitHub Actions (CI/CD), Vercel, Netlify
- Deployment : Docker, CI/CD Pipelines, AWS EC2, AWS S3, Nginx, GitHub Actions (CI/CD), Vercel, Netlify
- Architecture : Microservices, MVC, MVP, Test-Driven Development

Work Experience

Senior Full Stack Developer | DevShine, Faisalabad, Pakistan, Sep 2024 – May 2026

- Developed reusable React components and implemented server-side rendering (SSR) and static site generation (SSG) using Next.js for optimized performance.
- Managed state efficiently using Redux Toolkit and Context API for complex applications. Integrated RESTful APIs and GraphQL to fetch and display dynamic data in React applications. Optimized SEO by leveraging Next.js features like meta tags, dynamic routing, and pre-rendering. Implemented real time features using WebSockets and Socket.IO for dynamic updates.
- Used TypeScript to enforce type safety and reduce runtime errors in React and Next.js projects.

React.js Developer | Entspos Developer Lahore Aug 2023 - Jun 2024

- Built scalable and maintainable front-end architectures using React.js and Next.js.
- Implemented authentication and authorization flows using NextAuth.js and JWT.
- Optimized performance by code-splitting, lazy loading, and using Next.js image optimization features.
- Collaborated with UX/UI designers to translate Figma designs into pixel-perfect React components.
- Implemented progressive web app (PWA) features for offline functionality and enhanced user experiences.

Web Developer | Soft Tech Faisalabad Dec 2022 - July 2023

- Built and maintained full-stack web applications using React.js and Node.js, with clean and scalable architecture.
- Conducted code reviews to maintain high-quality standards and enforce best practices across the team.
- Mentored junior developers to strengthen team skills and foster a collaborative, growth-oriented environment.

Projects

DevShine – AI App Web App Technologies NextJS TypeScript Tailwind CSS MongoDB Prisma Firebase Stripe Shadcn SendGrid

- DevShine builds innovative digital products combining AI, automation, and modern web technologies, delivering end-to-end solutions including web apps, SaaS platforms, and e-commerce systems with a strong focus on design, performance, and scalability.

Mood Refresh – AI Interior Design Platform – Next.js 15, React 19, TypeScript, Tailwind CSS, Medusa V2, PostgreSQL, Stripe, Zustand, Framer Motion, Docker, GitHub Actions

- Built an AI-powered interior design SaaS where users complete a conversational quiz and receive curated, shoppable mood boards with furniture recommendations.
- Architected on a headless commerce stack (Medusa V2) with Stripe payments, PostgreSQL, and CI/CD via GitHub Actions and Docker.

BrandsAPI – AI App Web App Technologies NextJS TypeScript Tailwind CSS MongoDB Prisma Firebase Stripe Shadcn SendGrid

- Architected and shipped a high-performance Brand Data API platform that empowers developers and businesses to instantly retrieve complete brand assets logos, colors, fonts, company metadata, and digital files through a single, blazing-fast API call.

Slasher – Horror Social Media Platform – React Native, TypeScript, NestJS, Socket.IO, MongoDB, AWS EC2, Docker

- Built a React Native mobile app for horror movies with real-time Socket.IO messaging, Firebase push notifications, and user relationship features.
- Deployed on AWS EC2 with Docker and Nginx-based CI/CD pipeline for zero-downtime releases.

PasswordPact / 911Vault – Mobile App Web App Technologies AWS Django-Python Firebase MUI MongoDB NextJS ReactJS SendGrid Stripe Tailwind CSS TypeScript

- PasswordPact is a secure web and mobile app for encrypted file sharing and digital legacy planning. It lets users pass on sensitive data safely through its event-based vault system, where trust and privacy meet technology.
- Built as the evolution of 911Vault, PasswordPact blends password management with secure digital inheritance. Our team owned everything, architecture, backend, QA, encryption, and mobile apps, creating a product where security and empathy coexist.

Gullabs – Sneaker Design House Web App Technologies Shopify Firebase NodeJS ReactJS MongoDB Cloud Infrastructure UI/UX Design

- Engineered a full-stack AI-powered ad generation platform enabling businesses and developers to instantly create high-converting UGC video ads, static image ads, and complete ad campaigns across Meta, TikTok, and Google – through a single product link input.
- Built scalable frontend architecture supporting real-time ad generation workflows, Shopify store catalog integration, and one-click multi-platform ad publishing with dynamic creative variations.

Cover Up Online – Global E-Commerce Platform – Next.js 14, React 18, Firebase, Firestore, Algolia, Odoo ERP

- Built a full-stack global e-commerce platform with a comprehensive admin dashboard for product management, order processing, and analytics
- Integrated Odoo ERP via XML-RPC for real-time product sync and Algolia for advanced search, significantly improving product discovery

DevicePin – AI & Software Development Platform – Next.js, TypeScript, Node.js, MongoDB, AWS

- Developed a full-stack platform for AI-powered software, web, and mobile solutions.
- Built scalable frontend and backend architecture with secure APIs and cloud deployment.
- Integrated automation workflows and AI features to enhance business operations.

Education

Bachelor of Science in Computer Science

Ncbae University, Lahore

Gamica Cloud IT Training Center

Web and Mobile App Development– 1 Year Intensive Program
